👤 PROFILE

Student in **Systems Administration, Security & Networks** at PST&B (3rd-year Bachelor, dual-degree with UPEC), with professional experience on projects combining **applied AI, automation, development, integration and infrastructure**.

I enjoy operating **at the crossroads of business and tech**: starting from a real need (client, product, operational), framing it with an **analytical approach**, then turning it into a concrete, deployable solution (**AI agents, platforms, workflows**). In parallel, I have a solid business foundation: **sales, prospecting, partnerships, team management** and **operational leadership**.
